

GI360 Clinical Evening Series Complex Gut. Clear Answers.

Join us for an evening with two clinical experts - advanced stool testing in practice, from result to decision.

SYDNEY CBD

Wednesday 22nd July 2026

Arrive 5:30 pm · Sessions from 6:00 pm

MELBOURNE

Thursday 23rd July 2026

Arrive 5:30 pm · Sessions from 6:00 pm

About This Evening

Practitioners are facing increasingly complex, non-responsive gut cases and with a crowded stool testing market, the challenge is no longer which test to order. It's knowing how to move confidently from a result to a decision.

This live evening event brings together an internationally recognised GI360 educator and an Australian clinical practitioner for a focused, case-driven session designed to sharpen how you test, interpret, and treat.

Light canapés and refreshments on arrival from 5:30 pm. A relaxed opportunity to connect with fellow practitioners before sessions begin.

Programme

Session 1 | 6:00 - 7:15 pm 60 min presentation + 15 min Q&A

Precision Gut Testing - Linking Clinical Challenges to Targeted Solutions

One of the world's leading GI360 educators joins us to address the clinical questions Australian practitioners are genuinely wrestling with - moving beyond methodology to interpretation, decision-making, and treatment precision.

Session outline:

- ✓ The current clinical landscape: rising complexity, non-response, and where practitioners lose confidence post-result
- ✓ GI360 through a clinical lens: detection versus actionable insight, and how to move from data to decision
- ✓ Application to key presentations: post-infectious IBS & post-viral gut dysfunction, chronic dysbiosis, Candida interpretation, travel-related parasitology, and paediatric considerations
- ✓ Case integration: examples demonstrating improved clinical clarity and treatment precision
- ✓ Practical integration: when to order GI360 and how it supports the full treatment plan

Dr. Julia Malkowski

Presented by **Dr Julia Malkowski, ND, DC, BSc**

Dr. Julia Malkowski graduated with a doctorate in Naturopathic Medicine in December 2017, with advanced standing, and a doctorate in Chiropractic Medicine in April 2016 from National University of Health Sciences. Dr. Malkowski has completed Biomedical Treatment for Autism Spectrum Disorders Seminar, Fundamentals of Functional Blood Chemistry, Mastering the Thyroid Seminar and 100 hours in Functional Neurology applied to Childhood Neurobehavioral Disorders. Dr. Malkowski began a career in Naturopathic Medicine after seeing firsthand its excellent results at restoring the health of her infant son.

Advanced Gut Repair & Microbiome Restoration

A structured, clinically actionable framework for repairing the gut - bridging microbiome findings with staged treatment strategies for practitioners managing chronic, complex, and non-responsive cases.

Session outline:

- ✓ The reality of gut dysfunction in practice: why patients remain non-responsive and the gap between testing and effective repair
- ✓ Intestinal permeability through a clinical lens: immune activation, systemic symptoms, and identifying when permeability is the primary driver
- ✓ Microbiome disruption and loss of diversity: dysbiosis patterns, ecological imbalance, and functional implications - SCFAs, immune modulation, barrier support
- ✓ Treatment strategies in practice and gut repair framework: remove drivers, key compounds, mucosal healing support, restoring diversity, and when to sequence vs layer interventions for long-term resilience
- ✓ Clinical application and case integration: structuring treatment plans, timelines for healing, monitoring progress, and preventing relapse, with real patient scenarios

Warren Maginn

Presented by **Warren Maginn**, BHSc. Nutr. Med. GradCert. Hum. Nutr.

Practitioner and Educator Warren Maginn is a Clinical Nutritionist, College Lecturer and Public Educator specialising in the optimisation of health through the principles of Functional Medicine and a highly individualised approach to personal care. As a contributing National Association member and Scientific Advisor to practitioner resource companies, Warren is passionate about assisting practitioners and students to gain greater technical insights from laboratory testing and how to apply this knowledge in clinical practice.

Every Ticket Includes

Complimentary GI360 Select Test valued at \$499

- use for yourself or a patient, valid 3 months from event date.

\$50 RN Labs Product Voucher

- redeemable across the full RN Labs products range (therapure and RN Labs products only)

FREE complimentary full-size product

Canapés & Refreshments - light food and drinks on arrival from 5:30 pm

Includes:

Two full clinical sessions + Q&A

- ✓ Full goodie bag for every attendee
- ✓ CPE points
- ✓ This event will not be recorded

Ticket Price:

\$99

including GST

Only 30 seats available in SYD - places selling fast

Only 20 seats available for MELB - places selling fast
